## ABOUT US

Nextgen Systems is an international investment institution focused on delivering the best synergy of encrypted currency investing.

**We are in the business of helping individuals and institutional investors identify Cryptocurrency Mining investment opportunities.**

The core objectives of NGS are maintaining an accumulative return on investment (ROI), through the optimization of investment portfolios using multicoin mining agreements. Thus, providing strategic insights and operational skills in blockchain, while making sure all potential risks are avoided.

It is our mission through economies of scale and efficient mining rigs to continually increase our hashing power to successfully mine the most profitable cryptocurrencies, providing our clients across the globe with the highest quality of service and return on investment.

### **Privacy Policy**

NextGen Systems is a self-regulated cryptocurrency service provider. To maintain our groups privacy and tax-free status, we do not divulge any of our members private information to any 3rd party, either private or government institution as is required from obtaining a license from such institutions.

# OUR BELIEFS

**We believe that Blockchain, the underlying technology that enables cryptocurrency transactions, is proving to be one of the most meaningful new tech ideas that will fundamentally change finance.**

The recent increases we have seen in Bitcoin and other cryptocurrencies is representative of the imminent failure of fiat currencies. We only have to look at the recent decline of the British Pound and Turkish Lira as a warning. As the US and other countries, including Australia, continue to rely on quantitative easing as a measure to repair a rapidly failing monetary system, we need to look seriously at ways to protect our wealth. Are you prepared for when the next global financial crisis happens and the value of the Australian Dollar drops 70% over night?

The potential in Bitcoin is undeniable. it is proving to be one of the only vehicles that will not only protect your wealth but will also allow you to accumulate massive amounts of new wealth.

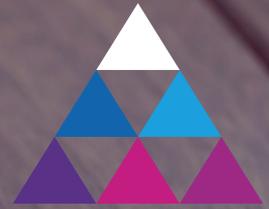

Governments and banks have proved time and time again that they cannot manage our money, Through Bitcoin and blockchain technology we finally have a way to take this control back Start mining your coins and get control today!

# INITIAL MINING AGREEMENTS (IMAs)

NextGen Systems' team of cryptocurrency analysts will take market conditions & daily events into consideration over the full period of your agreement.

NextGen Systems may from time to time reserve the right to change the initial coin/ coins mined on your chosen package. Monthly/Yearly returns are based on past performance and do not take into account difficulties, rate decreases/increases or coin changes that may occur in the future. All coins Mined on your chosen agreement are paid directly into your Bitcoin wallet daily and are available for you to spend or reinvest.

# FEATURED INITIAL MINING AGREEMENTS (IMAs) PACKAGES

## Nextgen Earth

IMA term  
36 Months  
Monthly ROI

\$ 199.00 - \$ 464.33

Mined Coins

upfront cost

**\$ 19,900**

100% of upfront cost is returned in full at the end of each 36-month IMA.

Returns Credited to your Nextgen account on daily basis & available for withdraw or reinvestment

## Nextgen Moon

IMA term  
36 Months  
Monthly ROI

\$ 431.17 - \$ 663.33

Full term expected ROI

\$ 25,074.00

Mined Coins

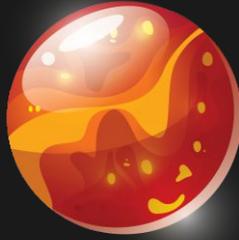

upfront cost

**\$ 39,800**

100% of upfront cost is returned in full at the end of each 36-month IMA.

Returns Credited to your Nextgen account on daily basis & available for withdraw or reinvestment

## Nextgen Venus

IMA term  
36 Months  
Monthly ROI

\$ 995.00 - \$ 2,122.67

Full term expected ROI

\$ 56,118.00

Mined Coins

upfront cost

**\$ 79,600**

100% of upfront cost is returned in full at the end of each 36-month IMA.

Returns Credited to your Nextgen account on daily basis & available for withdraw or reinvestment

## Nextgen Mercury

IMA term  
36 Months  
Monthly ROI

\$ 1,969.17 - \$ 4,170.00

Full term expected ROI

\$ 110,505.00

Mined Coins

upfront cost

**\$ 139,000**

100% of upfront cost is returned in full at the end of each 36-month IMA.

Returns Credited to your Nextgen account on daily basis & available for withdraw or reinvestment

## Nextgen Sun

IMA term  
36 Months  
Monthly ROI

\$ 4,414.33 - \$ 9,293.33

Full term expected ROI

\$ 246,738.00

Mined Coins

upfront cost

**\$ 278,800**

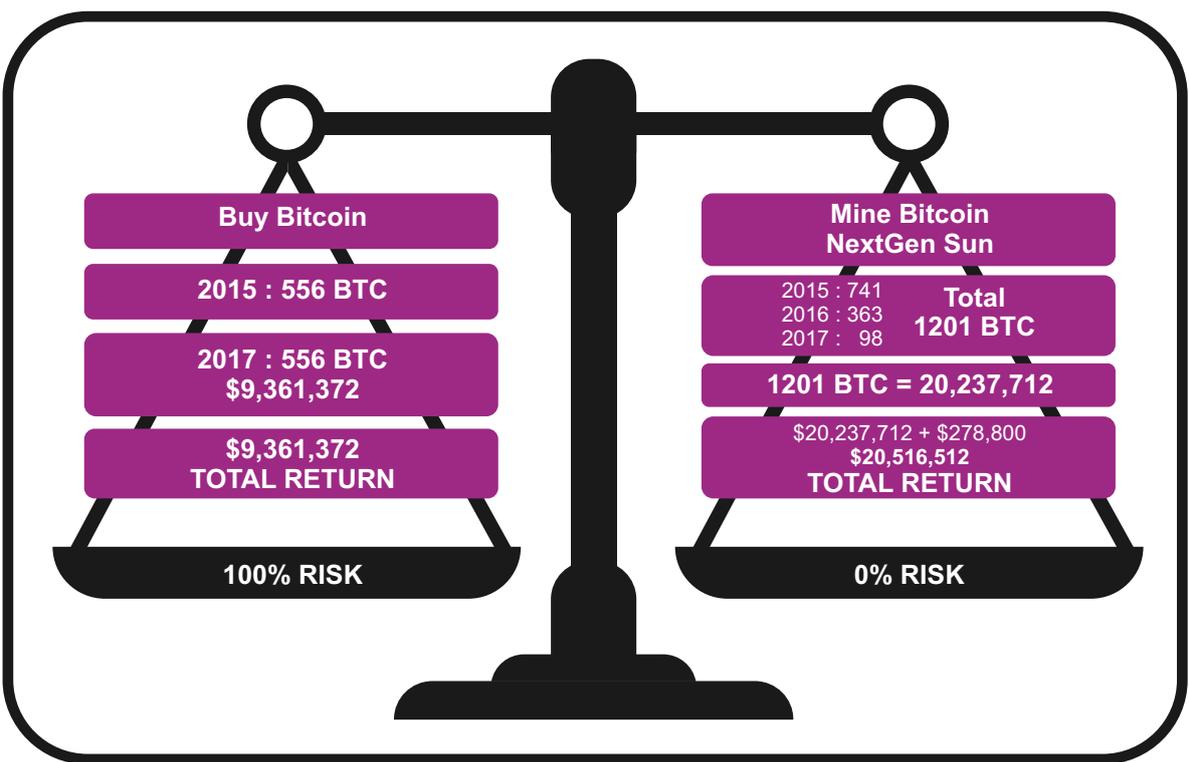

100% of upfront cost is returned in full at the end of each 36-month IMA.

Returns Credited to your Nextgen account on daily basis & available for withdraw or reinvestment

# Is it Better to Mine or Buy Bitcoin?

**When considering an investment, one should always measure the risk against the potential returns.**

When purchasing Bitcoin outright your capital is at risk 100% of the time. With the extreme volatility of the price of Bitcoin, this approach may cause some sleepless nights and upset stomachs. September 2017 saw Bitcoin hit an all-time high of \$5000, only to lose 40% of its value overnight. April 2013 saw the price of Bitcoin lose 71% of its value in a few hours. The price did recover over time in both instances but those types of price swings are not for everyone. Short term gains on trading Bitcoin are undeniable; however, over medium to long term, mining is not only more profitable but carries significantly less risk. With the initial cost of the IMA being returned in full at the end of the 36-month period, in fact, the risk is zero. The chart below shows the results of mining versus buying from 2015 till December 2017.

# Frequently Asked Questions

## **How do you guarantee at the end of my 36-month IMA that 100% of my upfront cost is refunded to me?**

NextGen Systems unconditionally guarantees 100% of the upfront cost of each IMA investment issued will be directly deposited back to the client's nominated bank account at the expiry of the 36 months.

## **What happens if NextGen Systems goes out of business tomorrow?**

As mining is an asset based investment, during any part of the Initial Mining Agreement if it becomes clear to NGS that mining is no longer profitable or commercially viable, NGS agrees to refund 100% of the IMA upon 90 days notice.

## **Where is your company registered?**

NextGen Systems is 100% decentralized and self-regulated.

## **Is there any limit or maximum number of IMAs that can be purchased?**

No, there are no limits

## **Are my Bitcoins safe in my NGS wallet account?**

Yes All mined coins are securely stored in a Nano Blue hardware wallet and stored offline.

**NextGen Systems offer Secure OffLine Storage Solutions for our clients.**

# Frequently Asked Questions (Cont'd)

## **How long does it take to withdraw my Bitcoin from my NGS account?**

Anywhere from 1 minute to 12 hours based on the current fee level you choose either Low, medium or high at the time of the transaction.

## **How often will I receive profits from my IMA?**

Mining profits are credited directly to your NGS account on a daily basis and are available instantly for withdraw or reinvestment.

## **Can I visit the office and meet your employees in person?**

Yes NextGen Systems has an open-door policy, whether Australia, Bali or Hong Kong, given 24 hours' notice via phone call or email with your account manager, we can not only facilitate your visit, but arrange transportation and accommodations based on your requirements

## **Why does mining Bitcoin carry nowhere near the same amount of risk as buying Bitcoin?**

When mining Bitcoin your returns are guaranteed based on computing power (Proof of Work), which means if the price of Bitcoin rises, the number of coins mined is reduced and therefore in a bubble scenario where Bitcoin crashes, as miners we would still finish up receiving a higher rate of physical Bitcoin to the same value based on Proof of Work. Therefore, by simply buying Bitcoin, as a speculative investment, this approach will increase your risk exposure to 100%.

## **Is it too late for me to get involved in Cryptocurrency Mining?**

No. NextGen Systems Clients First, Profits First Policy focuses strongly on generating 36-month residual returns that are credited daily to your NGS account.

# Frequently Asked Questions (Cont'd)

## **How long does it take to have my IMA set up?**

21 days

## **Do I have to set up my own Bitcoin Wallet?**

No. NextGen systems will allocate you with your own personalized account manager, who will go through the various cloud based and hardware based wallets available and step you through the different levels of security options to ensure that your mined coins are safely secured and stored at all times.

## **Can I use my own wallet?**

Yes

## **Why are my mining returns paid in Bitcoin?**

Bitcoin currently has the largest market cap as an individual coin and therefore represents currently the safest store of value.

## **Should I give my private keys or password information to my financial advisor, accountants or third parties?**

No. It is your responsibility to keep your private keys and passwords safe and secure at all times.

## **Can I make less than the minimum monthly advertised returns on my IMA?**

No. Your minimum monthly returns are guaranteed based on computing power (POW) proof of work. If you refer to 2015, 2016 and 2017 returns, clients have generally exceeded NGS publicly advertised returns.
